

BE PREPARED FOR HURRICANE SEASON June 1 ~ November 30,

Hurricane Season is here. We ask residents and property owners to prepare by formulating a hurricane action plan that includes family members and pets.

Several of our properties are located in mandatory Hurricane Evacuation Zones. Know where to evacuate should the Office of Emergency Management (OEM) in your county give an evacuation order. Be aware that basic services (electricity, telephone, police, and fire rescue) may not be available. Plan to relocate inland or out of town. When you have identified a safe evacuation location, notify Property Management of your alternate contact information so that we can inform you when it is safe to return home.

PREPARE A PERSONAL EVACUATION PLAN

- Y If you are out of town during Hurricane Season, identify an individual(s) (other than Property Management Employees) who will secure your home prior to a storm. Notify that person of their responsibility.
- Y Prior to departing your home for the summer months, move all outdoor furnishings inside.
- Y Ensure you have sufficient Homeowners or Renters Insurance if applicable to handle repairs in the event of damages or loss to your residence. Contact your insurance agent.
- Y Identify where you will stay **PRIOR** to an OEM evacuation order: hotel, friend's home, out of town; and find shelters for pets. (www.PetsWelcome.com)
- Y Once an Evacuation Order is issued, all property employees will also be required to evacuate.
- Y Keep telephone numbers of important persons and places handy, including a State road map.
- Y Listen for up-to-date information on local Radio and Television broadcasts.

HURRICANE WATCH - Issued within 36 hours of when hurricane conditions are expected.

WHAT TO DO WHEN A HURRICANE WATCH IS ISSUED

- Y Listen to local Radio and TV broadcasts or NOAA weather radio reports for storm information.
- Y Bring patio furniture indoors, close hurricane shutters (*if installed*) and contact your hurricane designated person.
- Y Fill your gas tank and move your vehicle if you are in a Flood Zone.
- Y Check radio batteries and stock up on first aid supplies, canned foods, a manual can opener, drinking water, medications, extra cash, and an automobile cell phone charger.

HURRICANE WARNING - Issued within 24 hours of when hurricane conditions are expected.

WHAT TO DO WHEN A HURRICANE WARNING IS ISSUED

- Y Listen to local news broadcasts for a 'Mandatory Evacuation Order'.
- Y When the 'Order' is received - Evacuate immediately.
- Y If you are caught indoors during a hurricane, stay away from windows and move to the center of your home, in a closet or bathroom without windows.
- Y Be alert for tornadoes that spawn during the storm, and stay away from floodwaters, which may have hidden dangers including downed power lines.
- Y Be aware of the storm's 'eye'- A period of deceptive calm during the storm which is usually followed by additional hurricane force winds.
- Y Use stairwells - Electricity will be disrupted and elevators, if applicable, may be out of service.
